SWING GATE
MECANIC TRIPOD

BODY	89X3 mm 304 quality stainless steel
ARMS	One piece welded 25x2 mm stainless steel
WEIGHT	~ 17 kg
ENERGY	24 V DC for model with electric lock
SYSTEM	It works with thrust. The stop system is spring loaded. It has 90° movement capability. The locking system is manually keyed or electrically locked. Thanks to the spring, the wing comes back into place and the cake is closed.

Despite its elegant and thin structure, it has a solid body.
