ACC-ER-UHF2-5E-PRO

UHF Antenna / RFID Reader

ACC-ER-UHF2-5E-PRO is a UHF antenna / RFID reader designed for contactless identification in access control and vehicle management applications. Its panel-style housing allows fixed installation at controlled entry and exit points.

Key Features

- UHF RFID technology
- Contactless UHF tag identification
- Suitable for vehicle access applications
- Compatible with UHF RFID tags
- Integrated cable connection
- Panel-style fixed installation
- Designed for access control and parking systems

Specifications

Item	Description
Product Code	ACC-ER-UHF2-5E-PRO
Product Type	UHF RFID antenna / reader
Technology	UHF RFID
Identification	Contactless UHF tag reading
Application	Vehicle access control / parking / RFID identification
Installation	Fixed panel installation
Compatible Media	UHF RFID tags
Connection	Integrated cable connection
Use Environment	Access control and vehicle management systems

Application

Suitable for RFID identification at entry and exit points, vehicle barriers, parking systems, and other installations requiring contactless UHF tag verification.
