AUMS-12S

Range of magnetic contacts for window and door use.

Wired magnetic sensor for security and locking window openings, doors, hatches, etc. Works with all types of alarm systems that can work with wired sensors. Normally close upon contact of the two elements.

Description

Technical parameters of Megnetic contact for window and door use AU-MS-12S 36903	
Supply voltage:	60 [VDC]
Sensing distance:	20~25 [mm]
Sockets:	NO
Dimensions:	27x14x8 [mm]
Number of conductors:	2 [conduct.]
Output power:	5 [W]
Maximum output current:	50 [mA]
Model:	AU-MS-12S
Operating temperature:	-20~50 [°C]
