Wireless PIR BRAVO Curtain

BRAVO Curtain is a wireless PIR combined with a microwave detector for installations requiring “curtain” type coverage in the protected site.

The PIR and MW parts are operating in “AND” function. Typical applications – protection of windows and areas around buildings.

Description

combined “curtain” (MW+PIR); two-way communication; Detection for PIR and MW part 12m; LED indication for low battery and Test mode;

Battery (type CR123A)	1 x 3 V/1500mAh
Battery life	1 year
Operation frequency	~868 MHz
Radio distance (open space)	Up to 400m
Operating temperature	-20°C – +60°C
PIR part coverage angle	90° vertical, 7.5° horizontal
MW part coverage angle	80° vertical, 32° horizontal
Max. covering range for PIR and MW part	12m
Mounting height (optimal)	1.5 – 3m (2.1m)
Inhibition time between two alarms	3/6 min. (programmable via dip switch)
Dimensions	129 x 40 x 48mm
Protection	IP54; IP65*
