Aluminum Electronic Access Control Button

EB-15B

What is a key switch for an alarm system?

Key switch means an electrical switch that uses the same security key code adopted by the Fire Department and used for emergency access to gated communities, electrically operated doors, and industrial gated areas.
It can also control emergency power shutoff systems.

Specifications

Dimensions	86 X 86 X 33mm	Suitable for Door	Hollow Door
Input	DC12V	Operating temp	-10 ℃ ~ 55°C (14°F-131°F)
Contact Rating	DC36V,3A	Operating Humidity	0-95% (non- condensing)
Output Contact	NO/COM	Weight	0.2Kg
Mechanical Life	500000 tested	Standard Packing	100pcs
