DESCRIPTION

Dual UHF hand-held wireless microphone and belt-pack???Wireless microphone with excellent range and sound quality. The transmitter uses an integrated audio and transmission management solution on a single chip, based on a DSP audio processor and PLL frequency control. Compared to systems integrating discrete components, the stability and reliability of this system is far superior.Our microphone uses traditional FM modulation technology with high sound quality.Fixed-frequency transmission channels provide ease of use.It has a highly efficient battery power management design that allows for prolonged use of the microphone.Low-noise, balanced output and mixed unbalanced output for easy connection.Compact and simple design.Consisting of a dual receiver and two transmitters, one hand-held and one belt-pack microphone. The hand-held wireless microphone has an unidirectional dynamic capsule that maximises direct voice pick-up and noise and indirect sounds suppression. And belt-pack transmitter with clip-on microphone with efficient voice pick-up.Suitable for events with portable microphones, such as presentations, conferences, events, performances, etc.
