Pro-grade wireless security system
for ultimate protection

Specification Sheet

Holder for DoubleButton | Button

Bracket to fix Button or DoubleButton on surfaces

AJ-HoldButton-W/B

Bracket to fix Button or DoubleButton on surfaces

Always at hand

Holder helps to install the panic button where it will be rapidly accessible in an emergency and makes using the remote control for scenarios even more convenient. The wireless device will remain portable: the button can be quickly detached from the holder and used as a key fob.

Designed by perfectionists

Holder design does not compromise the ergonomics of the button and provides a secure fit. It could be attached to a surface with two screws or on double-sided adhesive tape—thanks to the large, flat area, even such an installation method is reliable. Button and DoubleButton are attached and detached from the holder in one motion. No need to use any tools and waste time.
