DESCRIPTION

Window Intercom
Window intercom that facilitates communication through windows or protective screens.
This window intercom amplifies voice in both directions, improving communication and reducing the effort needed to speak. It makes conversations easier in places where people are separated by protective windows or in noisy environments.
Allows hands-free communication.
It features independent volume control for the microphone and the window unit, allowing better adjustment to user needs.
For privacy at the station, it includes a mute button for both the inside and the window unit.
Easy to install and maintain.
Ideal for ticket booths, banks, cashier counters, control posts, toll stations, parking entrances, etc.
