BRAVO LAN

BRAVO
WIRELESS SERIES

LAN Communication Module

- Built-in mounting in BRAVO panel
- Serial interface connection on slot
- Remote control via AjaxWEB / MobileTTE

BRAVO LAN is a communication module designed for operation in BRAVO wireless intruder alarm systems. The module is mounted into the BRAVO panel via serial interface connection and sends event messages to the user through the MobileTTE smart phone application.

The module can be programmed via ProsTE software or the AJAX SP user web interface and can also be used for remote management, programming and monitoring of the BRAVO system.

Features

- Built-in mounting in BRAVO panel
- Serial interface connection on slot
- Remote control via AjaxWEB user interface or MobileTTE smart phone application
- Internet remote programming of the BRAVO panel via AJAX SP software
- Push Notification messages for events to user via AJAX SP (to MobileTTE)
- Direct programming via ProsTE software
- Remote control, management and programming via AJAX SP software and MobileTTE application

Technical Specifications

Product type	LAN communication module
System	BRAVO wireless intruder alarm
Mounting	Built-in in BRAVO panel
Panel connection	Serial interface / slot
User access	AjaxWEB / MobileTTE
Remote programming	AJAX SP software
Event reporting	Push Notifications via AJAX SP
Direct programming	ProsTE software
Management	Remote control / monitoring

AjaxWEB / AJAX SP and MobileTTE naming follows the supplied product documentation.
