DESCRIPTION

TOUR-200T, total control in guided tour communication

The TOUR-200T is a bidirectional wireless transmitter for tour guide systems designed to facilitate smooth, clear, and managed communication during guided tours in museums, exhibitions, or sightseeing tours. This model allows audio reception from any receiver in the system, enabling precise and professional interaction control with participants. Its compact and durable design, along with an intuitive interface, makes it a reliable tool for the daily work of tour guides.

Advantages of the TOUR-200T
The TOUR-200T offers technical features that enhance communication control and quality:

Managed bidirectional communication: allows the transmitter to receive audio from a single receiver and retransmit it to all others in real time.
High compatibility: transmits to an unlimited number of TOUR-200R receivers on the same channel.
Portable and robust design: compact dimensions, lightweight, and durable housing, ideal for continuous professional use.
Multichannel: features 18 channels and supports up to 4 simultaneous operational channels.
Integrated LCD screen: clearly displays the channel, battery level, and volume for simple and effective control.

Why choose the TOUR-200T?
The TOUR-200T is a versatile and advanced solution that perfectly adapts to the needs of tourism and cultural professionals:

Range of up to 100 meters, suitable for large spaces, both indoors and outdoors.
Functional controls: bidirectional communication switch, on/off, mute, channel selection, and volume control.
Professional inputs: microphone and line input via 3.5 mm jack, with included lapel microphone and earpiece.
Up to 17 hours of battery life thanks to its 1300 mAh rechargeable battery with micro USB B charging.
Included and optional accessories: earpiece with microphone, neck strap, and compatibility with headset, charging cases, and synchronizer.

TECHNICAL CHARACTERISTICS

FEATURES	Bidirectional wireless transmitter. You can receive audio from any receiver, only one at a time, which will also be heard on all receivers. Two-way transmission control. Small size, lightweight and durable design Transmission to as many TOUR-200 receivers as desired on the same channel. 18 channels, GFSK mono modulation. Up to 4 channels can operate simultaneously. Delay of 35 ms. Range 100 m. Rechargeable internal battery, up to 17 hours of operation. Simple and intuitive handling. LCD display, shows the chosen channel, battery level and volume. Automatic shutdown function.
FREQUENCY	863 - 865 MHz GFSK modulation, 18 channels RF power: 10 mW
RESPONSE	20-3,000 Hz
CONTROLS	Bidirectional communication switch On/off and mute switch Channel selection and volume control
INPUTS	Microphone with clip-on microphone and headset included, 3.5 mm jack plug Line, 3.5 mm jack plug integrated in clip-on microphone
POWER SUPPLY	Rechargeable Li-polymer battery, 3.7 V 1300 mAh, micro USB B Recharge time 7 h Autonomy: 17 h
COLOUR	White
DIMENSIONS	40 x 82.6 x 12 mm depth
ACCESSORIES	Earphone with microphone Lanyard
OPTIONAL	TOUR-HEADSET: Headset with microphone. TOURC-12: 12-receiver charging case TOURC-305: 35-receiver charging case TOURKS-1: receiver synchroniser
